INDRAWAX 6545

Indrawax 6545 is a low-range melting point petroleum scale wax. The wax appears as a translucent crystalline material in the solid state and a water white clear liquid when molten. It is derived from petroleum via a carefully controlled refining process and is primarily comprised of a mixture of straight chain normal paraffin and branched, iso-paraffin hydrocarbons.

Indrawax 6545 can be used in candle wax blends, wax emulsions, and other applications.
